CAPABILITY STATEMENT

Creating Intelligent Buildings & Smart Offices

Originated in January 2016 by a group of veteran electronic technologists with over 40 years experience - Level Up Automation is a full service commercial technology, design and automation firm servicing the US and Canada. Level Up serves as the access point for companies seeking technology forward solutions that enhance their space to support wellness, productivity and innovation. Broad technology capabilities and deep experience enable a single point of contact for clients under one roof across multiple disciplines. Capabilities include creating smart spaces with end to end design, build and programming that supports commercial needs that are client focused and technology forward.

Smart Space Experience Design

Strategic consultation to discuss office trends, vision, budget & timeline. Intelligent space design utilizing cutting edge experience approaches to enable collaboration, wellness, productivity, energy efficiency and innovation. Smart glass, smart white boards, integrated video conference technology, automated furniture, smart energy systems.

Interactive Digital Displays and Video

One room and multi room video solutions including distribution and communication. Video walls, custom mounting solutions, automated furniture, automated mounts, MOIP systems and media carts.

Security Cameras and Systems

Outdoor and indoor security camera design, support and installation. Central station backed as requested.

Automated Shades & Lighting

Centralized automated shade and customized lighting design systems with a focus on wellness and customized experiences.

Cellular Boosters

Cellular signal booster procurement, installation and programming for multi-unit dwellings and commercial spaces to improve cellular signals for users.

Commercial Audio

One room and multi space audio design, installation and ongoing service support for both indoor and outdoor rated solutions.

Information Technology and Networks

Network engineering, design, installation and ongoing support. IoT product and service consulting.

Special Needs Assistive Technology

Leadership in creating spaces that utilize technology to help the independence, safety and experience of individuals and groups with special needs.
